

Value Proposition for Foundry from Enpro Enterprises.

Total Metal Treatment and Casting Process : Technical and Commercial Aspect

Dear sir.

We would like to bring to your kind notice that, Enpro has started offering "Total Value Proposition" from melting to casting for Cast Iron and S G Iron foundries.

We start from metal chemistry, treatment , moulding, till casting feeding system.

We contribute as below.

1. Metal chemistry requirements and its major additives like Carbon, Silicon, Copper.
2. Metal treatment and its major additives like Inoculation, Nodularant.
3. Metal filtration aids like foam, extruded and presses filters.
4. Moulding additive like Naturally occurring Bentonite.
5. Core making chemicals – all kinds of resin systems.
6. Mould / Core dressing coatings as per its requirement.
7. Casting Feeding Riser systems.
8. Casting rejection – trouble shooting.
9. Induction melting furnace lining materials.
10. Liquid metal treatment and transport with insulating and refractory ladles.

We propose to have your time and a meeting with you for discussion and sharing knowledge, experience with techno commercial appropriate solutions .

Expecting your positive reply.

Regards.

For Enpro Enterprises,

S.R.Kadukar.
